

# We are rooted in Stewardship

Stewardship- the responsible and careful management of something entrusted to your care, such as a natural resource, property, or project.

## **What that means to us:**

Stewardship is the responsibility to nurture ecosystems so that they can thrive long after we're gone. It means understanding how water flows, how plants grow, how communities depend on living systems, and making choices that restore, not deplete.

# Stewardship connects to...

- 🌱 Applied Ecology – working with natural processes, not against them
- 🌀 Permaculture – designing resilient systems that mimic ecosystems
- 🐝 Biodiversity – honoring the relationships that sustain life!
- 🌊 Watershed Management – holding water on the land and healing hydrology
- 🌾 Regenerative Agriculture – rebuilding soil, food systems, and community health

**Pillars of Planting:** Native • Edible • Medicinal • Pollinator-Friendly

Stewardship isn't just principle, it's practice! We plant, we build, we restore, and we learn together

 **Watershed Stewardship Projects — integrating permaculture design with stream restoration and stormwater resilience**

# Natural Resources Fund Community Foundation

Natural Resources Fund  
Community Foundation of Greater Clemson

COMMUNITY  
FOUNDATION  
OF GREATER CLEMSON

## Purpose

The Natural Resources Fund will provide tax-deductible support for local projects that care for our land and water. This permanent fund will give our community the power to take action that protects the places we depend on. Together we can build a resilient future through the teamwork of living networks — linking land, water, and people. By backing projects grounded in Applied Ecology and Soil Health, donors can trust their contributions will lead to visible, lasting results. Projects may include stream health efforts, tree planting, expanding shade canopy, creating pollinator habitats, planting native species, removing invasive plants, improving soil stability, or other local efforts that strengthen both nature and community.

## Funding Goal:

We must raise \$5,000 to establish the fund. Your pledge today will help us meet that goal.

- Tax-deductible contribution
- Local, visible impact
- Permanent community asset

Funds will be collected once the \$5,000 threshold is reached.

## Letter of Commitment

I/We pledge the following amount toward the establishment of a Conservation Fund:

Amount Committed: \$ \_\_\_\_\_

Name/Organization: \_\_\_\_\_

Address: \_\_\_\_\_

Email: \_\_\_\_\_ Phone: \_\_\_\_\_

Signature: \_\_\_\_\_ Date: \_\_\_\_\_

## How to Submit:

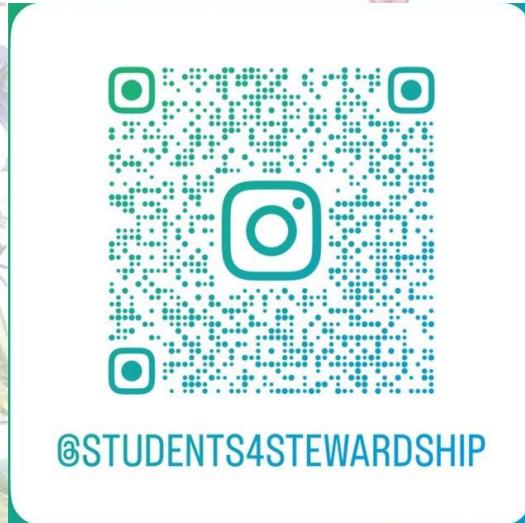

Please return this completed form to:  
Andrew Evans - [Ace4@clemson.edu](mailto:Ace4@clemson.edu) - (843) 229-0685

*Together, we can protect and restore Clemson's land and water.  
Your contribution plants the seeds of a stronger, healthier future.*

EVENT TIME

12:00 -  
4:00 PM

Join us for vendors, speakers, and fun!

# CULTIVATE CLEMSON NORTH GREEN

Come join Students for Stewardship as we host Cultivate Clemson, an event all about cross pollinating the Clemson Community! Meet clubs that work in sustainability and stop by to listen to our amazing speakers!

## Items for Sale:

- Charlie Brown Christmas Trees
- Native Bee Houses
- Blue bird houses
- Aloe Plants

## Speakers

- Farm Girl Deliveries
- Native Plants Society
- Treehouse Trade School

## Speaker Times

- 12:15 PM
- 1:45 PM
- 3:15 PM
